

Dragon Fire Gloves: by Fireman's Shield

Fireman's Shield Gloves

All **Fireman's Shield Gloves** are lined with the revolutionary Kovenex™ fabric, offering flame / heat resistant without compromising comfort.

Extrication Gloves:

Tested to receive a **Thermal Protective Performance (TPP)** rating of 8 (as designed and certified by the **National Fire Protection Association**), the Fireman's Shield Extrication Gloves are the first extrication glove on the market with a fire rating!

Fireman's Shield has taken their basic extrication glove to the next level and now offer it with a Blood Born Pathogen Resistant Barrier, or BBP.

Structure Gloves:

Models Alpha and the new Alpha X, are all made with high quality leather and synthetic materials, available in cuff of non cuff style, both are NFPA 1971: 2007 certified. The new Alpha X Model features Fourchette Finger construction and Premium soft Italian Leather.

Lightweight, comfortable and durable with added protection across the knuckles and the back of the hand to save injury from impact and reinforced in areas of high stress.

New to North America, **Fireman's Shield Gloves** are taking the industry by storm and quickly becoming the innovation leader. **They set the standard, and everyone else is just playing catch up!**
